The company started with web development and design solutions during its inception phase and now has more than 25 departments like CRM development, Branding solutions, ERP implementation solutions, database administration & development, business intelligence and data analytics and more. With over 40 plus employees we are continually growing in each and every technology/domain. Extensive training and research programs for all our trainers and developers strengthen our grip and make us better in what we do.

PROJECT DEFINITION

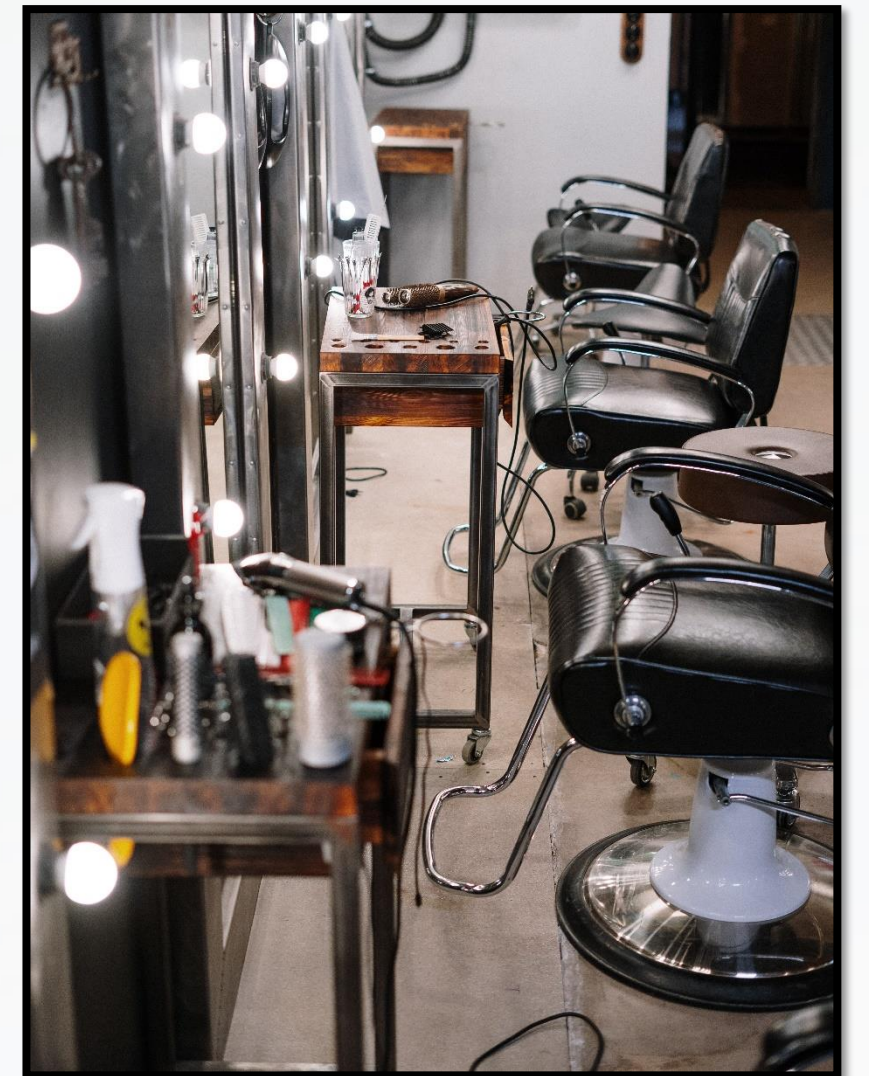

PROJECT DEFINITION

Tonsorium (Latin) is a location where a skilled barber offers services.

- Tonsorium Twits will be a web-based application which is used for the unisex Tonsorium.
- This system will manage the day-to-day tasks of the Tonsorium related to it's Admin, Customer and Staff Members.
- Customer can choose among multiple tonsoriums across City and manage Appointments online.
- Maintains the clients, offers, employees and accounts which include the bills, expenses etc.

EXISTING SYSTEM

EXISTING SYSTEM

- Currently there are web-apps available online such as:

<https://www.miosalon.com/>

<https://respark.in/>

<https://www.tonsorium.co.uk/>

- This all systems provide services to only single tonsoriums at a time.

PROPOSED SYSTEM

PROPOSED SYSTEM

- All existing systems provide services to only single Tonsorium.
- Our system provides platform to list down their Tonsorium's online on our platform and customer can choose Tonsorium's among multiple available options in their locations.
- They can Book, Schedule, Reschedule their appointments online with convenience from their homes to save their precious time.
- Also customer has option to choose Tonsoriums according to Ratings and Reviews in order to ensure that they get best services.
